

E250SA - Mixer Amplifier

The Prime E250SA series of amplifiers brings to the industry a series of quality, purpose built, 7 channel mixer amplifiers specifically developed to address the needs of schools etc. They are the culmination of years of design and exhaustive testing. Their modular design, along with the rugged construction includes the latest in technological advancements thus ensuring reliability and robust performance for many years to come. If you want value for money, along with an unbeatable range of useful features, all housed in a sturdy rack-mounted case, then look no further. With 250 Watts of output power these units are designed to perform and are built to last.

Features

- 250 Watts RMS into 100 Volt line or 8 Ohms with full floating outputs
- Facilities included for telephone paging, desk or hand held & radio microphones
- Inputs for CD player, cassette player & tuner
- 7 balanced XLR microphone, 6 dual RCA unbalanced auxiliary inputs. Phantom power selectable on all mic inputs
- Inputs 1 & 2 selectable vox mute priority over inputs 3 to 7, Input 1 has adj (preset) sensitivity
- Inbuilt limiter circuit to control audio over-load
- Electronic bell simulator plus selectable pre-announcement chime (2 or 4 tone)
- Alert & evacuation tones to AS2220-1989 plus inbuilt relays for remote alert & evac switching
- Front panel switches & rear terminals for bell, pre-announcement, chime, alert & evac tones
- Inbuilt monitor speaker with volume control (1 watt RMS)
- LED VU meters
- Slave amplifier socket
- Overload & short circuit protection
- Constant potential battery charger (1 amp @ 27.6 Volts)
- Standard 3U rack mounting with handles
- Delay circuit eliminates annoying thump at switch-on & switch off
- All modular design for ease of maintenance
- Large heat sinks for cooler operation
- 240 Volt AC or 24 Volt DC operation
- Dual channel programmable digital time clock (optional)

- Power Supply 240 Volts AC or 24 Volts DC
- Dimensions (mm) 482 W x 133 H x 350 D
- Colour Black
- Weight 18 Kg
